PROFESSIONAL SUMMARY

Full stack developer and QA analyst with 1 year 4 months at Orbe Soft, working in web development, regression test planning, and Tier 2/3 (N2/N3) technical support. Builds Node.js and PostgreSQL backends, React and Next.js interfaces, and React Native apps. Designed Kanghoo, a school transport platform with real-time GPS telemetry. Also works as an independent developer.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python

Frontend and Mobile: React.js, Next.js, React Native, Vite, Tailwind CSS, HTML5, CSS3, component-driven architecture, responsive design

Backend and Real-Time: Node.js, Express.js, Koa.js, WebSockets, Socket.IO, Awilix, JWT, Bcrypt, Clean Architecture, REST APIs

Databases and Caching: PostgreSQL, Redis, relational modeling, optimized queries

DevOps and Observability: Docker, Docker Compose, Nginx, Prometheus, Grafana, Linux, Git, GitHub, CI/CD, reverse proxy and SSL/TLS, dev and prod environment parity

Quality Assurance and Testing: functional testing, regression testing, user acceptance testing (UAT), bug lifecycle with severity, coverage and traceability matrices

Data and Machine Learning (academic and practical): TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, exploratory data analysis, business metric visualization

No-Code and Requirements: Webflow, BPMN, UML, traceability matrices, document management

PROFESSIONAL EXPERIENCE

Orbe Soft

May 2025 - Aug 2026

Software Developer & QA Analyst | Remote

Stack: Next.js, TypeScript, Tailwind CSS, React.js, Node.js, Webflow, Git

- **Web development:** Built and shipped conversion-focused landing pages and web applications with Next.js, TypeScript, and Tailwind CSS, using a component-driven architecture with attention to load performance.
- **Webflow portals:** Implemented and published corporate institutional portals in Webflow for energy-sector clients, reducing interface delivery time while keeping integration with existing systems.
- **Test plans:** Structured and executed functional, regression, and acceptance test plans for critical software flows, aiming for defect-free production releases (zero-defect standard).
- **Bug lifecycle:** Managed the full bug lifecycle (identification, severity-graded documentation, triage, and re-testing after the fix) to prevent regressions in already validated features.
- **Traceability:** Created coverage and traceability matrices linking functional requirements to executed test cases, reducing the risk of undetected failures in production.
- **Tier 2/3 support (N2/N3):** Diagnosed and resolved production incidents and software failures through log analysis and code debugging, reducing service downtime (MTTR).

Independent Developer (Workana and direct consulting)

workana.com/freelancer/74d3fb12657221480eee7f5aa54fcba5

Full Stack Developer (Web, Mobile, and Landing Pages) | Remote

Stack: React.js, Next.js, React Native, Node.js, Express.js, PostgreSQL, Redis, Tailwind CSS, REST APIs, Git

- **Full stack applications:** Built full stack web applications and SaaS platform MVPs on demand, from relational database design to reactive React and Next.js interfaces.

- **Mobile apps:** Built cross-platform mobile apps (iOS and Android) with React Native, including native components, REST API consumption, and local data persistence.
- **Landing pages:** Designed landing pages with technical SEO, microinteractions, and asset optimization using Tailwind CSS, aiming to maximize the Google Lighthouse performance score.
- **Integrations:** Integrated third-party systems and payment gateways through REST APIs, with data validation to avoid transactional inconsistencies.

PROJECTS

Kanghoo: School transport management platform

Feb 2025 - Dec 2025

Full Stack Developer and Architect | Capstone project and standalone product

Repository: github.com/rodrigosouzafeliciano/projeto-sistema-kanghoo

Stack: Node.js, Koa.js, PostgreSQL, Redis, Socket.IO, Docker, Nginx, Prometheus, Grafana, Awilix, JWT, Bcrypt

- **Architecture:** Designed the backend with Clean Architecture (Domain, Application, Infrastructure, Interface) and Awilix dependency injection, isolating business rules across more than 23 routes and controllers.
- **Database:** Modeled the PostgreSQL relational schema for school routes, student boarding and alighting confirmation, and hierarchical access profiles (drivers, guardians, and administrators).
- **Security:** Implemented JWT authentication, Bcrypt password hashing, and rate-limiting middleware to mitigate brute-force attacks and request overload.
- **Real time:** Implemented real-time GPS telemetry with WebSockets (Socket.IO) and Redis caching, continuously updating vehicle positions with low network latency.
- **Containers:** Containerized the services (API, database, cache, proxy, and monitoring) with Docker and Docker Compose, keeping development and production environments in parity.
- **Observability:** Integrated Prometheus (metrics) and Grafana to visualize node health in real time.

Personal portfolio

portfolio-rodrigo-pink.vercel.app

Responsive, modular site presenting project cases, with attention to Lighthouse performance.

Stack: Next.js, React.js, Tailwind CSS, TypeScript

EDUCATION

Universidade Pitágoras Unopar Anhanguera, Brazil

Aug 2026 - Dec 2028 (expected)

Technologist Degree (Superior de Tecnologia) in Systems Analysis and Development (ADS) | 2,200 h

Coursework: Software Engineering, Data Modeling, Cloud Computing, Testing Quality and Automation

Completed: Programming Language course (Python), grade 100/100; data analysis and visualization with Pandas, Matplotlib, and Seaborn; supervised Machine Learning classification (TensorFlow)

SENAC (Serviço Nacional de Aprendizagem Comercial), Brazil

Programador Web (Professional Qualification) | 240 h — Jul 2025 - Dec 2025

Full stack web development with production deployment, ending with the Projeto Integrador.

Programador de Sistemas (Professional Qualification) | 200 h — Feb 2025 - Jul 2025

Systems analysis, databases, testing and maintenance; development of the Kanghoo project.

Assistente Administrativo (Professional Qualification) | 160 h — Aug 2020 - Dec 2020

Organization of corporate processes, and drafting and control of organizational documents.

LANGUAGES

Portuguese: Native | **English:** Upper-intermediate (B2+) | **Spanish:** Basic

English: technical reading, documentation writing, and professional conversation. Workana English Test (2026): 93%.
